Hi Kaggler,

📋 **Today's Assignment**

1. Read this tutorial (from Lesson 7 of the Python course)
2. Complete this exercise (from Lesson 7 of the Python course)

💡 **What You'll Learn**

One of the best things about Python is the vast number of high-quality custom libraries that have been written for it. In **Lesson 7 (Working with External Libraries)**, you'll learn how to access this pre-written code and use it in your own work.

Once you have completed the assignment above, you're done for the week! Celebrate! You'll get a new email tomorrow with the plan for next week.

Happy learning,
Alexis
